

MOSS

Mobile Operations Sensors System

MOSS

Mobile Operations Sensors System was designed to assist in ambush operations.

The all-in-one wireless sensors provide complete 360° situational awareness; Detecting and classifying movement in key locations (penetration routes) and provide early warning to operators on field.

The MOSS system can be installed in minutes by field crew. The system is a Plug and Play, maintenance free and doesn't requires complex training to operate.

MOSS was designed for Military, LEAs (Law Enforcement Agencies), VIP protection and other security operations.

SensoGuard MOSS provides immediate terrain dominance on remote-open areas in a cost effective, and user friendly way.
